It's your against the creatures of the evil Bydo Empire! Pilot the supersecret R-9 fighter spacecraft through waves of aliens and their deadly war machines.

Loading Instructions: Starting Up

- 1) Make sure that the power switch is OFF.
- 2) Insert the game cartridge in the Power Base (shown below) as described in your SEGA SYSTEM manual.
- 3) Turn the power switch ON. If nothing appears on the screen, turn the power switch OFF, remove the cartridge, and try again.
- 4) At the title screen, press Button 1 to start the game.

IMPORTANT: Always make sure that the Power Base is turned OFF when inserting or removing your Sega Cartridge.

R-Type

They came from a dimensional plane clear across the galaxy, wreaking havoc and chaos from star system to star system. With an evil that smothers all resistance with fear and terror, the horrid creatures of the Bydo Empire are now knocking on Earth's front door.

The Earth Defense League has one ray of hope to stop the wave of terror: R-9, a supersecret spacecraft capable of striking the enemy in their own dimensional plane. When flown by a hot pilot like you, the R-9 can rip through bug-eyed monsters faster than a light saber through butter. But the horrendous creatures of the Bydo Empire are more than claws and pointy teeth; they've got some pretty impressive hardware, too, so stay frosty! Earth's future depends on you!

Taking Control

DIRECTIONAL
BUTTON
(D-Button)

BUTTON ①

BUTTON ②

D-Button: Moves your ship in eight directions.

Button 1: Fires your ship's energy weapons. Press repeatedly for rapid-fire pulse beam action, or hold the button before firing to activate R-9's laser blast. The longer you continue to hold the button, the more energy is accumulated and the more destructive power unleashed.

Button 2: To Merge and Separate Droid units, valuable additions to your ship that are acquired during the game.

Your Ship: The R-9

R-9 is Earth's most advanced and deadly spaceship. It is equipped with a nuclear fusion reactor for unlimited propulsion and weapons fire. At the start of the game, you have three R-9's at your disposal. When all your ships are lost, the game is over.

When you reach a score of 50,000 points, an extra R-9 will be awarded. Other ships are awarded after reaching scores of 150,000, 250,000, 400,000, and 600,000 points.

R-9

SPEED: 208 km/sec.

WEIGHT: 31.0 t

SPAN: 10.8 m

LENGTH: 16.2 m

HEIGHT: 5.1 m

Battle Stages

R-Type is played in eight different stages:

- 1: The Bydo Empire's frontline base.

- 2: The Bydo caves.

- 3: The Mega battleship.

4: The Terrible Mechanical cells.

5: The underwater caves.

6: The warehouse labyrinth.

7: The eroding city.

8: The Bydo Empire Home Base.

At the end of each stage is a tough boss alien protecting entry into the next level. You must defeat them to advance. By defeating the last creature at the end of level 8, you win the game and save the universe!

Your score and the number of remaining R-9 spaceships will be displayed at the clearing of each stage, but not during the battle scenes.

Droid Units

When Bydo POW Armor is destroyed, it releases Droid Units which look like metal spheres. To obtain Droids, fly through the blue force gem and the Droid will appear from the left side of the screen.

If you push Button 2, the Droid will advance toward R-9 and join with the ship. Droids shoot pulse beams in tandem with R-9, and cannot be destroyed. You can place the Droid in either the front or the rear of R-9 by steering your ship, wherever it will help you destroy the enemy best. Droids will absorb some types of enemy shots.

By pushing Button 2 again, you can separate R-9 from the Droid for an effective battle formation, depending on the enemy units attacking you. If the Droid gets a bit too far away, push Button 2 and bring it up close. The Droid will also fly on a diagonal line from you. You can use this ability to shoot a path of destruction through the enemy, or to concentrate fire on specific targets!

Laser performance and destructive power of the Droid change depending on how many Droid gem units you obtain (one, two, or three), and whether or not the Droid is attached to R-9.

After obtaining the second Droid gem, the Droid is able to shoot pulse beams diagonally up or down when separated from R-9. When the third Droid gem is obtained, it will shoot pulse beams up/down and diagonally up/down when separated from R-9.

Powering Up

To have any chance at all of killing the Bydo Empire's nastier creatures, R-9 needs to "power up." Power Up parts also appear when you defeat Bydo POW Armor units. After shooting them, POW Armor units drop various "unit symbols," which you pick up by flying over them.

There are six different types of unit symbols.

1: Reflecting Laser Force Units (blue)- Rather than

firing in a straight line, this powerful laser beam ricochets off objects.

2: Antiair Laser Force Units (red)-

This ring-style

laser shoots in a straight line, but has the strongest demolishing power, since the width of the

ring is very wide, making it easy to hit the enemy.

3: Speed Units- Increase the speed of your R-9 ship each time it is obtained.

4: Antiland Laser Force Unit (yellow)-
Shoots both top and bottom (up and down). When it hits an obstacle, it runs along the surface until it destroys an enemy in its path.

This weapon excels during fights with the Mega Battleship and during cave fights.

M 5: Twin Missile Units-
Homing radar automatically guides twin missiles to the nearest target. They can hit two targets at once.

6: Bit Units-
Up to two "Bits" (round power spheres that float above and below your ship) can be added to the R-9. They can shoot pulse beams, and kill the enemy when touched.
